Group C Contract # NNG15SD84B
NAICS: 541519 (Full and Open designation)

NASA SEWP V Ordering Guide

SEWP V General Overview

The SEWP V contract is a government-wide acquisition contract (GWAC) for Information Technology products and services. It is an indefinite delivery, indefinite quantity (IDIQ) contract available for use by all Federal Agencies and approved federal agency support contractors. Beginning May 1, 2015, SEWP V has a maximum value of \$20 billion and a 10-year performance period (five base years plus five optional one-year extensions).

SEWP V provides advanced technology solutions such as IT virtualization, infrastructure consolidation, AV solutions, servers, IT peripherals, network equipment, storage systems, security tools, software, and cloud-based services. It also offers product-based services like installation, training, maintenance, and warranty.

The SEWP V Business Operations & Workstation Laboratory (BOWL) oversees the SEWP V program and applies a small administration surcharge of 0.36% on all contract orders. This surcharge should be included in the item pricing and not listed separately.

For the best results, use the SEWP Quote Request Tool (QRT) available on the SEWP website (sewp.nasa.gov). This tool helps ensure fair opportunity and verifies that items quoted are on the contract and properly priced. All SEWP quotes and orders must be processed through the SEWP BOWL.

The SEWP V contract makes procurement EASY for government. Find out how, here: <https://www.sewp.nasa.gov/ordering.shtml>

SEWP V Goals

- FA Flexible, easy to use customer centric GWAC federal buyers can source all of their IT requirements from
